Biology and Fertility of Soils

Founded in 1985
by J. C. G. Ottow

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-0727, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 6 13-9 93-92 51; Fax: 6 13-9 52-82 43; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 22 · 1996

Aarnio T, Martikainen PJ: Mineralization of carbon and nitrogen, and nitrification in Scots pine forest soil treated with fast- and slow-release nitrogen fertilizers 214
Abenavoli MR → Muscolo A
Allen EB → Allen MF
Allen MF, Figueroa C, Weinbaum BS, Barlow SB, Allen EB: Differential production of oxalate by mycorrhizal fungi in arid ecosystems 287
Ankomah AB, Zapata F, Hardarson G, Danso SKA: Yield, nodulation, and N_2 fixation by cowpea cultivars at different phosphorus levels 10
Arora DK → Srivastava AK
Arshad MA → Soon YK
Azcón R, Gómez M, Tobar R: Pyhsiological and nutritional responses by *Lactuca Sativa* L. to nitrogen sources and mycorrhizal fungi under drought conditions 156

Bååth E → Frostegård A
Bachmann G → Vedder B
Baert L → Zhengping W
Banerjee MR, Chapman SJ: The significance of microbial biomass sulphur in soil 116
Bardgett RD, Hobbs PJ, Frostegård Å: Changes in soil fungal: bacterial biomass ratios following reductions in the intensity of management of an upland grassland 261
Barlow SB → Allen MF
Baskaran S → Bolan NS
Bauhus J, Meyer AC, Brumme R: Effect of the inhibitors nitrapyrin and sodium chlorate on nitrification and N_2O formation in an acid forest soil 318
Bernal MP, Navarro AF, Roig A, Cegarra J, García D: Carbon and nitrogen transformation during composting of sweet sorghum bagasse 141
Bhadauria T, Ramakrishnan PS: Role of earthworms in nitrogen cycling during the cropping phase of shifting agriculture (Jhum) in north-east India 350
Blakeley RL → Chaiwanakupt P
Bolan NS, Baskaran S: Characteristics of earthworm casts affecting herbicide sorption and movement 367
Brown JA → Sarathchandra SU
Bruckner A → Vedder B
Brumme R → Bauhus J
Buchhorn SC → Pedler JF
Bull CM → Hughes MS
Burch G → Sarathchandra SU
Burford JR → Patra AK

Cabaneiro A → González-Prieto SJ
Carballas M → González-Prieto SJ
Carballas T → González-Prieto SJ
Carballas T → Vázquez FJ
Carcía D → Bernal MP
Cegarra J → Bernal MP
Cegarra J → Orozco FH
Chaiwanakupt P, Freney JR, Keerthisinghe DG, Phongpan S, Blakeley RL: Use of urease, algal inhibitors, and nitrification inhibitors to reduce nitrogen loss and increase the grain yield of flooded rice (*Oryza sativa* L.) 89
Chang XC, Juma NG: Impact of crop rotations on microbial biomass, faunal populations, and plant C and N in a Gray Luvisol (Typic Cryoboralf) 31
Chapman SJ → Banerjee MR
Cheng DX → Wassmann R
Ciavatta C → Marzadori C
Cleemput O van → Zhengping W
Concheri G → Muscolo A
Cox NR → Sarathchandra SU

Daniel O, Kohli L, Schuler B, Zeyer J: Surface cast production by the earthworm *Aporrectodea nocturna* in a pre-alpine meadow in Switzerland 171
Danso SKA → Ankomah AB
Deng SP, Tabatabai MA: Effect of tillage and residue management on enzyme activities in soils. I. Amidohydrolases 202
Deng SP, Tabatabai MA: Effect of tillage and residue management on enzyme activities in soils. II. Glycosidases 208
Devasenapathy P, Palaniappan SP: Increasing urea-N efficiency in transplanted lowland rice by urea solution band placement 283
Djajakirana G, Joergensen RG, Meyer B: Ergosterol and microbial biomass relationship in soil 299
Doube BM → Hughes MS
Dušek L, Tesařová M: Influence of polychlorinated biphenyls on microbial biomass and its activity in grassland soil 243

Elliott LF → Horwath WR
Eriksen J: Incorporation of S into soil organic matter in the field as determined by the natural abundance of stable S isotopes 149
Esashi Y → Ota H

Feigenbaum S → Steffens D
Figueroa C → Allen MF
Freney JR → Chaiwanakupt P
Frostegård A, Bååth E: The use of phospholipid fatty acid analysis to estimate bacterial and fungal biomass in soil 59
Frostegård Å → Bardgett RD

Gessa C → Marzadori C
Gessa C → Vittori Antisari L
Gioacchini P → Vittori Antisari L
Goede RGM de: Effects of sod-cutting on the nematode community of a secondary forest of *Pinus sylvestris* L. 227
Gómez M → Azcón R
Gon HACD van der, Neue H-U: Oxidation of methane in the rhizosphere of rice plants 359
Gonzalez-Lopez J → Martinez-Toledo MV
González-Prieto SJ, Cabaneiro A, Villar MC, Carballas M, Carballas T: Effect of soil characteristics on N mineralization capacity in 112 native and agricultural soils from the northwest of Spain 252
Graham RD → Pedler JF
Gupta S → Srivastava AK

Hardarson G → Ankomah AB
Hilster LM → Pallant E
Hobbs PJ → Bardgett RD
Hopkins DW, Shiel RS: Size and activity of soil microbial communities in long-term experimental grassland plots treated with manure and inorganic fertilizers 66
Hopkins DW → Webster EA
Hopkins DW → Webster EA
Horwath WR, Elliott LF: Microbial C and N dynamics during mesophilic and thermophilic incubations of ryegrass 1
Hughes MS, Bull CM, Doube BM: Microcosm investigations into the influence of sheep manure on the behaviour of the geophagous earthworms *Aporrectodea trapezoides* and *Microscolex dubius* 71
